🌐 Fares Emad

### 👤 Profile

Using Django (Python) or any other framework/language, backend developers want to get experience in the field. I am also a quick learner and very adaptable to change.

### 🎓 Education

**Faculty of Computer and Information Sciences - Mansoura University** [🔗](#)  
CS department

2019 – 2023

### 💼 Work Experience

**Qematy** [🔗](#)

Backend Developer

May 2023 – present  
Mansoura, Egypt

- Building web apps in Python and Django (Modely)
- Other Languages / Libraries : Postgresql, DRF and Celery
- Revision control: Git & Github
- OS: Linux
- Other technologies used : nginx and gunicorn
- Deployment: Name, Digitalocean

**Center Royal Academy for Training**

Python Instructor

Jun 2022 – Aug 2022  
Mansoura, Egypt

- I have been explaining the Python programming language to more than 8 groups

### 🖱️ Technical Skills

Git version control

Basic knowledge of Docker

Python

OOP

Automation

SQL

Django

RESTful APIs

Django REST framework

Django ORM

Celery

Reliable web development

Performance optimization

Payment integration (Stripe/PayPal)

Deployment

Testing

Frontend

Html, Css, Js

## Skills

- Good Presentation Skills
- Time Management
- Project Management

## Projects

### Artech

Graduation Project

- **Mcq tests, hand drawing and Digital drawing**
- **GitHub:** <https://github.com/faresemad/Artec> 
- **Technologies:** Python, Django, DRF, Swagger, Unicorn, Sqlite3
- **Version Control:** Git & Github
- **Deployment:** AWS

### Modely

Qematy

- **The ultimate platform for models and employers to showcase talent and get hired**
- **Google play:** <https://play.google.com/store/apps/details?id=com.modelyAgency.modely> 
- **Other Languages / Libraries :** Postgresql, DRF, Swagger and Celery
- **Version Control:** Git & Github
- **OS:** Linux
- **Other technologies used :** nginx and unicorn
- **Deployment:** Name, Digitalocean

### Whatsapp Clone

Simple real-time chat application with Django.

- **GitHub:** <https://github.com/faresemad/whatsapp-clone> 
- **Other Languages / Libraries :** Python, Django, Sqlite3, Channels, HTML, CSS, JavaScript
- **Version Control:** Git & Github

### Dj-Online-Shop

A functioning online e-shop that uses the Django framework to build the web application.

- **GitHub:** <https://github.com/faresemad/Dj-Online-Shop> 
- **Technologies:** Python, Django , Sessions, Celery and RabbitMQ
- **Version Control :** Git & Github
- **Main Idea:** How to use Django Sessions, Celery and RabbitMQ

### To-do Api

Todo-API is a simple RESTful API built with Django that allows users to CRUD Operation tasks.

- **GitHub:** <https://github.com/faresemad/ToDo-App> 
- **Technologies :** Python, Django, Django Rest Framework
- **Version Control :** Git & Github

### DjTranslation

Django Multi-Language (Translation), translate by middleware.

- **GitHub:** <https://github.com/faresemad/DjTranslation> 
- **Main Idea :** How do I translate my django website in the simplest way

## Certificates

- Basics of Python 
- Python Data Structures 
- Python for Beginners 
- Python Core 
- The Python and Django Learning Guide
