### EDUCATION

2019 – 2023 *Faculty of Computer and Information Sciences - Mansoura University*

### PROFESSIONAL EXPERIENCE

Nov 2023 – present Pinedale, Wyoming, United States	<b>Soft Talents LLC, Backend Developer</b> 
May 2023 – Nov 2023 Al Qasim, KSA	<b>Qematy, Backend Developer</b> <ul style="list-style-type: none"><li>• <b>Modely :</b> Contributed with team to the ultimate platform for models and employers, implementing Postgresql, DRF, CkEditor, and Openpyxl. Utilized technologies like nginx and gunicorn.</li><li>• <b>Evis, Electric Vehicle Innovation Summit :</b> Contributed to the annual Smart Mobility Conference and Exhibition, using Postgresql, DRF, CkEditor, and Openpyxl. Employed technologies such as nginx and gunicorn.</li><li>• <b>STS, The Space Travel Summit :</b> Engaged in the pioneering Space Travel Summit, leveraging technologies including nginx and gunicorn along with Postgresql, DRF, CkEditor, and Openpyxl.</li><li>• <b>Albdah Aqar :</b> Revolutionizing Property Management , Orchestrated image upload functionality, addressing challenges in managing high volumes and large-sized property images using Python, Django, and Django Rest Framework.</li><li>• <b>Nirvana , Nirvana MICE:</b> Specializing in the travel and tourism industry with Nirvana MICE, proficient in utilizing Postgresql, DRF, openpyxl, and drf_spectacular in building technical solutions. Experienced in deploying technologies such as nginx, docker, and gunicorn for efficient application development and deployment.</li></ul>

### SKILLS

#### Programing Languages

- Python
- JavaScript

#### Third-party service integration

#### Continuous integration and deployment (CI/CD)

#### Test-driven development (TDD)

#### Django Rest Framework

#### Git Version Control

#### Database Design And Optimization

- MySQL
- Postgresql

#### Object-Oriented Programming (OOP)

#### Linux/Unix Command Line

#### Restful Web Services And APIs

#### Docker and Containerization

---

## PROJECTS

---

### E-Commerce App [↗](#)

Developing an e-commerce application provides hands-on experience in implementing authentication, designing intricate models, and integrating payment gateways.

### Blog [↗](#)

A robust blogging web application powered by Django, featuring authentication, CRUD operations, post management, commenting, and integration with Celery, Celery Beat, Flower, Redis, and Nginx for enhanced functionality and scalability.

### Manarat-AlSakan [↗](#)

- Developed functionally optimized real estate project

### ChatApp [↗](#)

- Simple real-time chat application with Django.

### Simple Online Shop [↗](#)

- A functioning online e-shop that uses the Django framework to build the web application.
- Managing a payment method integrated with stripe
